INDEX OF KEY-WORDS

Acetylaminfluorene, Enterotoxin, *Escherichia coli;* Detection, Faeces, AAF-DNA probes, ETEC 315
Acinetobacter, Lignin; Non-phenolic β-*o*-4, Model compound, Degradation 333
Actin, *Rickettsia conorii, Rickettsia typhi,* Virulence, Motility; Actin polymerization, Intracellular movements 821
Actinobacillus, Plasmid, Replicon, *Pasteurella;* Cloning vector, Gene expression, Broad host range, Electroporation 263
Adenylate cyclase, Phosphorylation, Enzyme III^{Glc}, Glycolysis; Inducer exclusion, Protein folding, PTS, *E. coli* 251
Adhesion, Fimbria, Chaperone, FimC protein, Periplasm; Sequencing, Polymerization, Type 1 fimbriae biogenesis, *Escherichia coli,* Mannose 831
Adhesion, Virulence, *Entamoeba histolytica, Shigella flexneri,* Mannone; Receptors, Type I pili, Invasive phenotype, Cooperation 67
AIDS, Tuberculosis, *Mycobacterium tuberculosis, Mycobacterium,* Immunoregulation; Virulence, Markers; Forum 361
Allele replacement, M Protein, Phagocytosis, Virulence, *Streptococcus pyogenes;* Pathogenesis, Koch's postulates 549
Aminoglycoside acetyltransferase, Promoter, Transcription; Mapping, Homologies, Antibiotic biosynthesis 133
Amphotericin B, Desertomycin, Phospholipid, *Saccharomyces uvarum,* Spheroplast; Plasma membrane, Cell growth, Subinhibitory doses 695
Anaerobiosis, *Bacteroides fragilis,* Bacteriocin; Antagonistic substances, Marmoset 151
Antibiotic, PTS, Permease; Novel therapeutic compounds, PEP, Method; Hypothesis 443
Antigenicity, *Borrelia;* Antigenic variation and heterogeneity, Recombinant proteins, Vaccination 583
Azospirillum, Nitrogenase, Nitrogen fixation, Nodule; 2,4-D, Wheat, Paranodule, Ethylene production 847
Bacillus alcalofilus, Oxidative phosphorylation, *Bacillus firmus;* F_1F_0-ATP synthase, Alkaliphile species, Sequence motif 467
Bacillus firmus, Oxidative phosphorylation, *Bacillus alcalophilus;* F_1F_0-ATP synthase, Alkaliphile species, Sequence motif 467
Bacillus subtilis, Operon, Transduction, Bacteriophage SPβ; Cloning vectors, Signal transduction, Two-component signalling systems, *degU* gene, Co-dominance 559
Bacterial growth, *Escherichia coli;* Metabolism, Nutrition, Anabolic and catabolic pools, Incorporation 173
Bactericidal effect, Isoniazid, Drug resistance, Catalase, Peroxidase, *Mycobacterium aurum, Mycobacterium smegmatis,* Tuberculosis; Virulence, Gene cloning 721
Bacteriocin, Anaerobiosis, *Bacteroides fragilis;* Antagonistic substances, Marmoset 151
Bacteriophage, Prophage, Conversion, Gem, DNA, Lysogeny, Operon; Supercoiling, Bacterial phenotype, Hypotheses 237
Bacteriophage SPβ, Operon, *Bacillus subtilis,* Transduction; Cloning vectors, Signal transduction, Two-component signalling systems, *degU* gene, Co-dominance 559
Bacteroides fragilis, Anaerobiosis, Bacteriocin; Antagonistic substances, Marmoset 151
BCG, Fibronectin, *Mycobacterium paratuberculosis, Mycobacterium phlei,* Johne's disease; Adherence, Phagocytosis, Host defences 75
Bdellovibrio bacteriovorus, Protease, PTS, Carbohydrate; PEP, Nutrition, *E. coli,* Cytoplasmic proteolysis, Energy 5
Biosynthesis, Spirochete, Genetics; Pathways, Metabolism, Heat shock proteins, Enzymatic profiles, RNA 605
Bordetella, Virulence, Pertussis toxin, Promoter; Regulation 671
Borrelia, Antigenicity; Antigenic variation and heterogeneity, Recombinant proteins, Vaccination 583
Brucella, Coagglutination, mAb; Rapid identification, Smooth strains 513
Brucella, DNA, rRNA; Gene restriction patterns, Cloned probe, Typing, Taxonomy 55

BtuB, Vitamin B_{12}, *Salmonella typhimurium;* Transport, Outer membrane protein, Nucleotide sequence, *btuB* gene 459
Campylobacter, Diarrhoea, IgA, Milk, Flagelline; Woman, Circulating antibodies ... 93
Campylobacter jejuni, Transposon, Leucine; Biosynthesis, Shuttle mutagenesis, Cloning, Allelic replacement 15
Candida, O antigen, *Salmonella, Escherichia;* Common antigenic factors; Note 533
Carbohydrate, Protease, *Bdellovibrio bacteriovorus,* PTS; PEP, Nutrition, *E. coli,* Cytoplasmic proteolysis, Energy 5
Catalase, Isoniazid, Bactericidal effect, Drug resistance, Peroxidase, *Mycobacterium aurum, Mycobacterium smegmatis,* Tuberculosis; Virulence, Gene cloning 721
Cell cycle, Plasmid, F plasmid, Replication; Origins, *Escherichia coli* 541
Cellulase, Cellulose, *Clostridium;* Colonization, Adhesion, Growth rate, Carbon deficiency 891
Cellulose, *Clostridium,* Cellulase; Colonization, Adhesion, Growth rate, Carbon deficiency 891
Chaperone, Fimbria, Adhesion, FimC protein, Periplasm; Sequencing, Polymerization, Type 1 fimbriae biogenesis, *Escherichia coli,* Mannose 831
Chemiluminescence, DNA, *Listeria monocytogenes;* Acridinium, Probe, Diagnosis, Food and clinical specimens, Rapid method 183
Chemotaxis, Spirochete, Motility, Flagella; Structure, Periplasmic flagella, *Treponema, Borellia, Serpulina* 597
Chlamydia psittaci, Zymotype, *Chlamydia trachomatis,* Virulence; Invasiveness, Ruminant isolates, Serotypes 525
Chlamydia trachomatis, rRNA; Restriction pattern, Cloned probe, Taxonomy, Typing, Biovars 755
Chlamydia trachomatis, Zymotype, *Chlamydia psittaci,* Virulence; Invasiveness, Ruminant isolates, Serotypes 525
Chromosome, Spirochete, Virulence, Plasmid; Minichromosome, Maxichromosome, Genetic capacity, Linear replicons 623
Cistron, Histidine, Mapping, Cloning; Biosynthesis, Transcription, *his* gene 683
Cloning, Histidine, Mapping, Cistron; Biosynthesis, Transcription, *his* gene 683
Clostridium, Cellulose, Cellulase; Colonization, Adhesion, Growth rate, Carbon deficiency 891
CNF, Haemolysin, Fimbriae, *Escherichia coli,* Virulence; Toxins, P fimbriae 869
Coagglutination, *Brucella,* mAb; Rapid identification, Smooth strains 513
Colony, Mycelium, Water; Formation, Hyphal growth, Apical direction, Filamentous fungi 777
Conversion, Bacteriophage, Prophage, Gem, DNA, Lysogeny, Operon; Supercoiling, Bacterial phenotype, Hypotheses 237
Coproculture, *Salmonella;* Selective medium, NBGL 211
Cord factor, Tuberculosis, *Mycobacterium tuberculosis,* Glycolipid; Synthetic "mirror" pseudo cord factors, Serodiagnosis, Specificity, Sensitivity 217
Corynebacterium, Corynomycolic acid; HPLC, Mass spectrometry, Identification 191
Corynebacterium, Taxonomy; Group D2, Genomic species, *"C. urealyticum",* Phenotyping, Classification 307
Corynomycolic acid, *Corynebacterium;* HPLC, Mass spectrometry, Identification 191
Cytoplasm, Protein, Spirosome, Filament; *Escherichia coli,* Pyruvate dehydrogenase, Lipoamide dehydrogenase, Dihydrolipoamide acyltransferase, Alcohol dehydrogenase 743
Desertomycin, Amphotericin B, Phospholipid, *Saccharomyces uvarum,* Spheroplast; Plasma membrane, Cell growth, Subinhibitory doses 695
Diarrhoea, Haemolysin, *Vibrio parahaemolyticus;* Food poisoning, Kanagawa phenomenon, Purification, Properties 569
Diarrhoea, IgA, Milk, *Campylobacter,* Flagellin; Woman, Circulating antibodies 93
DNA, Bacteriophage, Prophage, Conversion, Gem, Lysogeny, Operon; Supercoiling, Bacterial phenotype, Hypotheses 237
DNA, *Brucella,* rRNA; Gene restriction patterns, Cloned probe, Typing, Taxonomy 55
DNA, Insertion, RFLP, IS*6110,* Transposition, *Mycobacterium;* Insertion sequences, Copies, Polymorphism, Diagnosis, Tuberculosis, Epidemiology 767
DNA, *Listeria monocytogenes,* Chemiluminescence; Acridinium, Probe, Diagnosis, Food and clinical specimens, Rapid method .. 183
DNA, PCR; Extraction, Chelating resin, Bacteria 785
DNA, PCR, *Listeria;* Typing, Fingerprints, RAPD analysis 499
DNA, Phage typing, RAPD, *Listeria monocytogenes;* Epidemiology, Comparative study 507
DNA, Plasmid, *Escherichia coli,* Supercoil; pUC18, Topology, Gyrase mutation, *recA* genotype, Bacterial growth 665
DNA, Plasmid, Mating, *Streptomyces bambergiensis, Streptomyces lividans;* Transfer, Linear DNA, Physical map 839

DNA, Spiramycin; Amplification, Genome instability, Regulated production 99
DNA, Supercoil, *Escherichia coli,* Replication; Initiation, Topology, Asynchrony, *dam, dnaA* 655
DNA, Vaginosis, *Gardnerella vaginalis;* RFLP, REA, Biotyping 199
DNA, Virulence, *Listeria monocytogenes;* Genes, Serovars, PCR, Restriction enzymes 281
Drug resistance, Isoniazid, Bactericidal effect, Catalase, Peroxidase, *Mycobacterium aurum, Mycobacterium smegmatis,* Tuberculosis; Virulence, Gene cloning 721
Entamoeba histolytica, Virulence, Adhesion, *Shigella flexneri,* Mannone; Receptors, Type I pili, Invasive phenotype, Cooperation 67
Enterobacteriaceae, Pyrazinamidase; Identification, Diagnostic test 773
Enterotoxin, Acetylaminfluorene, *Escherichia coli;* Detection, Faeces, AAF-DNA probes, ETEC 315
Enzyme III^{Glc}, Phosphorylation, Glycolysis, Adenylate cyclase; Inducer exclusion, Protein folding, PTS, *E. coli* 251
Erwinia chrysanthemi, Protease; Secretion, C-terminal secretion signal, Gene *prtG* . 857
Escherichia, O antigen, *Salmonella, Candida;* Common antigenic factors; Note 533
Escherichia coli, Acetylaminfluorene, Enterotoxin; Detection, Faeces, AAF-DNA probes, ETEC 315
Escherichia coli, Bacterial growth; Metabolism, Nutrition, Anabolic and catabolic pools, Incorporation 173
Escherichia coli, DNA, Plasmid, Supercoil; pUC18, Topology, Gyrase mutation, *recA* genotype, Bacterial growth 665
Escherichia coli, DNA, Supercoil, Replication; Initiation, Topology, Asynchrony, *dam, dnaA* 655
Escherichia coli, Haemolysin, Fimbriae, CNF, Virulence; Toxins, P fimbriae 869
F plasmid, Plasmid, Cell cycle, Replication; Origins, *Escherichia coli* 541
Fermentation, *Saccharomyces diastaticus,* Floculation, Mannose; Floculating mutant, Cell wall enzyme 81
Fibronectin, *Mycobacterium paratuberculosis, Mycobacterium phlei,* BCG, Johne's disease; Adherence, Phagocytosis, Host defences 75
Filament, Cytoplasm, Protein, Spirosome; *Escherichia coli,* Pyruvate dehydrogenase, Lipoamide dehydrogenase, Dihydrolipoamide acyltransferase, Alcohol dehydrogenase 743
Fimbria, Adhesion, Chaperone, FimC protein, Periplasm; Sequencing, Polymerization, Type 1 fimbriae biogenesis, *Escherichia coli,* Mannose 831
Fimbriae, Haemolysin, CNF, *Escherichia coli,* Virulence; Toxins, P fimbriae 869
FimC protein, Fimbria, Adhesion, Chaperone, Periplasm; Sequencing, Polymerization, Type 1 fimbriae biogenesis, *Escherichia coli,* Mannose 831
Flagella, Spirochete, Motility, Chemotaxis; Structure, Periplasmic flagella, *Treponema, Borellia, Serpulina* 597
Flagellin, Diarrhoea, IgA, Milk, *Campylobacter;* Woman, Circulating antibodies ... 93
Floculation, *Saccharomyces diastaticus,* Fermentation, Mannose; Floculating mutant, Cell wall enzyme 81
Food, Oligonucleotide, *Listeria monocytogenes;* Detection, Enumeration, PCR, Colony hybridization, DNA, *hly* gene, Species-specificity 271
β-Galactosidase, Plasmid, Lactose, *Vibrio cholerae;* GalR, Repressor, ChrA, Chromate resistance, *lacZ* gene 27
Gardnerella vaginalis, Vaginosis, DNA; RFLP, REA, Biotyping 199
Gem, Bacteriophage, Prophage, Conversion, DNA, Lysogeny, Operon; Supercoiling, Bacterial phenotype, Hypotheses 237
Gene *emm-6.1,* M protein, *Streptococcus pyogenes, Streptococcus gordonii;* Transcription, Chromosomic, DNA, Genetic engineering 449
Genetics, Spirochete, Biosynthesis; Pathways, Metabolism, Heat shock proteins, Enzymatic profiles, RNA 605
Genome, Spirochete; Structure, Insertion sequence, Extrachromosomal elements, *Borrelia burgdorferi, Treponema pallidum, Leptospira interrogans* 615
Glucosamine, *Thiobacillus neapolitanus,* Peptidoglycan, Lysozyme; DAP, N-acetyl, Chemolithotrophy 47
Glycolipid, *Mycobacterium,* Tuberculosis; Antigens, Phenolglycolipids, TLC, Speciation 519
Glycolipid, *Mycobacterium tuberculosis;* DAT, PGL-Tb1, DOT-ELISA, Detection 327
Glycolipid, Tuberculosis, Cord factor, *Mycobacterium tuberculosis;* Synthetic "mirror" pseudo cord factors, Serodiagnosis, Specificity, Sensitivity 217
Glycolysis, Phosphorylation, Enzyme III^{Glc}, Adenylate cyclase; Inducer exclusion, Protein folding, PTS, *E. coli* 251
Haemolysin, Fimbriae, CNF, *Escherichia coli,* Virulence; Toxins, P fimbriae 869
Haemolysin, *Vibrio parahaemolyticus,* Diarrhoea; Food poisoning, Kanagawa phenomenon, Purification, Properties .. 569

Histidine, Mapping, Cistron, Cloning; Biosynthesis, Transcription, *his* gene 683
Histidine, Mutation, *Salmonella typhimurium;* Environmental mutagenesis, His^+ revertants, Distribution of mutants, Selective factor, Poisson distribution 711
Hydrogenase, Nickel, Urease, Metalloenzyme, Protein; Bacterial metabolism, Histidine, Cystein, Motifs 347
IgA, Diarrhoea, Milk, *Campylobacter,* Flagellin; Woman, Circulating antibodies 93
Immunoregulation, Tuberculosis, AIDS, *Mycobacterium tuberculosis, Mycobacterium;* Virulence, Markers; Forum 361
Insertion, DNA, RFLP, IS*6110,* Transposition, *Mycobacterium;* Insertion sequences, Copies, Polymorphism, Diagnosis, Tuberculosis, Epidemiology 767
IS*6110,* DNA, Insertion, RFLP, Transposition, *Mycobacterium;* Insertion sequences, Copies, Polymorphism, Diagnosis, Tuberculosis, Epidemiology 767
Isoniazid, Bactericidal effect, Drug resistance, Catalase, Peroxidase, *Mycobacterium aurum, Mycobacterium smegmatis,* Tuberculosis; Virulence, Gene cloning 721
Johne's disease, Fibronectin, *Mycobacterium paratuberculosis, Mycobacterium phlei,* BCG; Adherence, Phagocytosis, Host defences 75
Lactococcus lactis, Nisin, Lactose; Biosynthesis, Regulation, Continuous cultures, Resting cells 879
Lactose, β-Galactosidase, Plasmid, *Vibrio cholerae;* GalR, Repressor, ChrA, Chromate resistance, *lacZ* gene 27
Lactose, Nisin, *Lactococcus lactis;* Biosynthesis, Regulation, Continuous cultures, Resting cells 879
Legionella, Legionnaires' disease, Transposon, Mutagenesis, Plasmid; Persistence, Replication 471
Legionella, Transposon, Legionnaires' disease, Virulence; Macrophage, Tn*5*, Defective growth, Multifactoriality 481
Legionnaires's disease, *Legionella,* Transposon, Mutagenesis, Plasmid; Persistence, Replication 471
Legionnaires' disease, Transposon, *Legionella,* Virulence; Macrophage, Tn*5*, Defective growth, Multifactoriality 481
Leucine, Transposon, *Campylobacter jejuni;* Biosynthesis, Shuttle mutagenesis, Cloning, Allelic replacement 15
Lignin, *Acinetobacter;* Non-phenolic β-*o*-4, Model compound, Degradation 333
Listeria, DNA, PCR; Typing, Fingerprints, RAPD analysis 499
Listeria monocytogenes, DNA, Chemiluminescence; Acridinium, Probe, Diagnosis, Food and clinical specimens, Rapid method .. 183
Listeria monocytogenes, DNA, Phage typing, RAPD; Epidemiology, Comparative study 507
Listeria monocytogenes, DNA, Virulence; Genes, Serovars, PCR, Restriction enzymes 281
Listeria monocytogenes, Listeriolysin O, Virulence; Serotypes 1/2a and 4b, Haemolytic activities 489
Listeria monocytogenes, Oligonucleotide, Food; Detection, Enumeration, PCR, Colony hybridization, DNA, *hly* gene, Species-specificity 271
Listeriolysin O, Virulence, *Listeria monocytogenes;* Serotypes 1/2a and 4b, Haemolytic activities 489
Lysozyme, *Thiobacillus neapolitanus,* Peptidoglycan, Glucosamine; DAP, N-acetyl, Chemolithotrophy 47
M protein, Gene *emm-6.1, Streptococcus pyogenes, Streptococcus gordonii;* Transcription, Chromosomic, DNA, Genetic engineering 449
M protein, Phagocytosis, Virulence, *Streptococcus pyogenes,* Allele replacement; Pathogenesis, Koch's postulates 549
mAb, Coagglutination, *Brucella;* Rapid identification, Smooth strains 513
Malassezia furfur, Skin; Growth, Methodology, Identification 731
Mannitol, PEP, PTS, Membrane insertion, Oligomerization, Permease; *E. coli,* Transport, Deletion mutations 139
Mannitol, Phosphotransferase, Permease, Oligomerization; System, Enzymes II, *E. coli,* Regulation, Membrane transport proteins 113
Mannose, *Saccharomyces diastaticus,* Fermentation, Floculation; Floculating mutant, Cell wall enzyme 81
Mannose, Virulence, Adhesion, *Entamoeba histolytica, Shigella flexnerie;* Receptors, Type I pili, Invasive phenotype, Cooperation 67
Mapping, Histidine, Cistron, Cloning; Biosynthesis, Transcription, *his* gene 683
Mating, DNA, Plasmid, *Streptomyces bambergiensis, Streptomyces lividans;* Transfer, Linear DNA, Physical map 839
Membrane insertion, Mannitol, PEP, PTS, Oligomerization, Permease; *E. coli,* Transport, Deletion mutations 139
Mercury, Sea water, Transposon; Bacteria, Resistance, Probe 341
Metalloenzyme, Nickel, Hydrogenase, Urease, Protein; Bacterial metabolism, Histidine, Cystein, Motifs 347
Milk, Diarrhoea, IgA, *Campylobacter,* Flagellin; Woman, Circulating antibodies 93

MLO, Yellow disease, Mycoplasma, Phytopathology; Grapevine, Detergents, ELISA, Diagnosis 791
Motility, Actin, *Rickettsia conorii, Rickettsia typhi,* Virulence; Actin polymerization, Intracellular movements 821
Motility, Spirochete, Chemotaxis, Flagella; Structure, Periplasmic flagella, *Treponema, Borellia, Serpulina* 597
Mutagenesis, *Legionella,* Legionnaires' disease, Transposon, Plasmid; Persistence, Replication 471
Mutation, *Salmonella typhimurium,* Histidine; Environmental mutagenesis, His^+ revertants, Distribution of mutants, Selective factor, Poisson distribution 711
Mycelium, Water, Colony; Formation, Hyphal growth, Apical direction, Filamentous fungi 777
Mycobacterium, DNA, Insertion, RFLP, IS*6110,* Transposition; Insertion sequences, Copies, Polymorphism, Diagnosis, Tuberculosis, Epidemiology 767
Mycobacterium, Glycolipid, Tuberculosis; Antigens, Phenolglycolipids, TLC, Speciation 519
Mycobacterium, Tuberculosis, AIDS, *Mycobacterium tuberculosis,* Immunoregulation; Virulence, Markers; Forum 361
Mycobacterium aurum, Isoniazid, Bactericidal effect, Drug resistance, Catalase, Peroxidase, *Mycobacterium smegmatis,* Tuberculosis; Virulence, Gene cloning 721
Mycobacterium phlei, Fibronectin, *Mycobacterium paratuberculosis,* BCG, Johne's disease; Adherence, Phagocytosis, Host defences 75
Mycobacterium paratuberculosis, Fibronectin, *Mycobacterium phlei,* BCG, Johne's disease; Adherence, Phagocytosis, Host defences 75
Mycobacterium smegmatis, Isoniazid, Bactericidal effect, Drug resistance, Catalase, Peroxidase, *Mycobacterium aurum,* Tuberculosis; Virulence, Gene cloning 721
Mycobacterium tuberculosis, Glycolipid; DAT, PGL-Tb1, DOT-ELISA, Detection 327
Mycobacterium tuberculosis, Tuberculosis, AIDS, *Mycobacterium,* Immunoregulation; Virulence, Markers; Forum 361
Mycobacterium tuberculosis, Tuberculosis, Cord factor, Glycolipid; Synthetic "mirror" pseudo cord factors, Serodiagnosis, Specificity, Sensitivity 217
Mycobacterium tuberculosis, Tuberculosis, Sulpholipid; Thin-layer chromatography, Diagnosis 225
Mycoplasma, Yellow disease, MLO, Phytopathology; Grapevine, Detergents, ELISA, Diagnosis 791
Neisseria gonorrhoeae, Transcription, Protein; Periplasmic proteins, Amino acid transport, *hisJ, argT,* Cloning, Translation, Immunogenicity 295
Nickel, Hydrogenase, Urease, Metalloenzyme, Protein; Bacterial metabolism, Histidine, Cystein, Motifs 347
Nisin, *Lactococcus lactis,* Lactose; Biosynthesis, Regulation, Continuous cultures, Resting cells 879
Nitrogen, *Rhizobium leguminosarum, ntrC* mutant; Control, Phenotype 161
Nitrogenase, Nitrogen fixation, Nodule, *Azospirillum;* 2,4-D, Wheat, Paranodule, Ethylene production 847
Nitrogene fixation, Nitrogenase, Nodule, *Azospirillum;* 2,4-D, Wheat, Paranodule, Ethylene production 847
Nodule, Nitrogenase, Nitrogen fixation, *Azospirillum;* 2,4-D, Wheat, Paranodule, Ethylene production 847
ntrC mutant, Nitrogen, *Rhizobium leguminosarum;* Control, Phenotype 161
O antigen, *Salmonella, Escherichia, Candida;* Common antigenic factors; Note 533
Oligomerization, Mannitol, PEP, PTS, Membrane insertion; Permease; *E. coli,* Transport, Deletion mutations 139
Oligomerization, Phosphotransferase, Permease, Mannitol; System, Enzymes II, *E. coli,* Regulation, Membrane transport proteins 113
Oligonucleotide, *Listeria monocytogenes,* Food; Detection, Enumeration, PCR, Colony hybridization, DNA, *hly* gene, Species-specificity 271
Operon, *Bacillus subtilis,* Transduction, Bacteriophage SPβ; Cloning vectors, Signal transduction, Two-component signalling systems, *degU* gene, Co-dominance 559
Operon, Bacteriophage, Prophage, Conversion, Gem, DNA, Lysogenie; Supercoiling, Bacterial phenotype, Hypotheses 237
Operon, rDNA, rRNA, *Streptococcus salivarus* subsp. *thermophilus;* Genetic polymorphism, RFLP, Ribotyping, Probes 37
Oxidative phosphorylation, *Bacillus firmus, Bacillus alcalophilus;* F_1F_0-ATP synthase, Alkaliphile species, Sequence motif 467
Pasteurella, Plasmid, Replicon, *Actinobacillus;* Cloning vector, Gene expression, Broad host range, Electroporation 263
PCR, DNA; Extraction, Chelating resin, Bacteria 785
PCR, DNA, *Listeria;* Typing, Fingerprints, RAPD analysis 499
PEP, Mannitol, PTS, Membrane insertion, Oligomerization, Permease; *E. coli,* Transport, Deletion mutations 139

Peptidoglycan, *Thiobacillus neapolitanus,* Glucosamine, Lysozyme; DAP, N-acetyl- Chemolithotrophy 47
Periplasm, Fimbria, Adhesion, Chaperone, FimC protein; Sequencing, Polymerization, Type 1 fimbriae biogenesis, *Escherichia coli,* Mannose 831
Permease, Mannitol, PEP, PTS, Membrane insertion; Oligomerization; *E. coli,* Transport, Deletion mutations 139
Permease, Phosphotransferase, Mannitol, Oligomerization; System, Enzymes II, *E. coli,* Regulation, Membrane transport proteins 113
Permease, PTS, Antibiotic; Novel therapeutic compounds, PEP, Method; Hypothesis 443
Peroxidase, Isoniazid, Bactericidal effect, Drug resistance, Catalase, *Mycobacterium aurum, Mycobacterium smegmatis,* Tuberculosis; Virulence, Gene cloning 721
Pertussis toxin, *Bordetella,* Virulence, Promoter; Regulation 671
Phage typing, DNA, RAPD, *Listeria monocytogenes;* Epidemiology, Comparative study 507
Phagocytosis, M Protein, Virulence, *Streptococcus pyogenes,* Allele replacement; Pathogenesis, Koch's postulates 549
Phospholipid, Amphotericin B, Desertomycin, *Saccharomyces uvarum,* Spheroplast; Plasma membrane, Cell growth, Subinhibitory doses 695
Phosphorylation, Enzyme III^{Glc}, Glycolysis, Adenylate cyclase; Inducer exclusion, Protein folding, PTS, *E. coli* 251
Phosphotransferase, Permease, Mannitol, Oligomerization; System, Enzymes II, *E. coli,* Regulation, Membrane transport proteins 113
Phytopathology, Yellow disease, Mycoplasma, MLO; Grapevine, Detergents, ELISA, Diagnosis 791
Plasmid, Cell cycle, F plasmid, Replication; Origins, *Escherichia coli* 541
Plasmid, Chromosome, Spirochete, Virulence; Minichromosome, Maxichromosome, Genetic capacity, Linear replicons 623
Plasmid, DNA, *Escherichia coli,* Supercoil; pUC18, Topology, Gyrase mutation, *recA* genotype, Bacterial growth 665
Plasmid, DNA, Mating, *Streptomyces bambergiensis, Streptomyces lividans;* Transfer, Linear DNA, Physical map 839
Plasmid, β-Galactosidase, Lactose, *Vibrio cholerae;* GalR, Repressor, ChrA, Chromate resistance, *lacZ* gene 27
Plasmid, *Legionella,* Legionnaires' disease, Transposon, Mutagenesis; Persistence, Replication 471
Plasmid, Replicon, *Pasteurella, Actinobacillus;* Cloning vector, Gene expression, Broad host range, Electroporation 263
Promoter, *Bordetella,* Virulence, Pertussis toxin; Regulation 671
Promoter, Transcription, Aminoglycoside acetyltransferase; Mapping, Homologies, Antibiotic biosynthesis 133
Prophage, Bacteriophage, Conversion, Gem, DNA, Lysogeny, Operon; Supercoiling, Bacterial phenotype, Hypotheses 237
Protease, *Bdellovibrio bacteriovorus,* PTS, Carbohydrate; PEP, Nutrition, *E. coli,* Cytoplasmic proteolysis, Energy 5
Protease, *Erwinia chrysanthemi;* Secretion, C-terminal secretion signal, Gene *prtG* . 857
Protein, Cytoplasm, Spirosome, Filament; *Escherichia coli,* Pyruvate dehydrogenase, Lipoamide dehydrogenase, Dihydrolipoamide acyltransferase, Alcohol dehydrogenase 743
Protein, Nickel, Hydrogenase, Urease, Metalloenzyme; Bacterial metabolism, Histidine, Cystein, Motifs 347
Protein, Transcription, *Neisseria gonorrhoeae;* Periplasmic proteins, Amino acid transport, *hisJ, argT,* Cloning, Translation, Immunogenicity 295
PTS, Mannitol, PEP, Membrane insertion, Oligomerization, Permease; *E. coli,* Transport, Deletion mutations 139
PTS, Permease, Antibiotic; Novel therapeutic compounds, PEP, Method; Hypothesis 443
PTS, Protease, *Bdellovibrio bacteriovorus,* Carbohydrate; PEP, Nutrition, *E. coli,* Cytoplasmic proteolysis, Energy 5
Pyrazinamidase, *Enterobacteriaceae;* Identification, Diagnostic test 773
RAPD, DNA, Phage typing, *Listeria monocytogenes;* Epidemiology, Comparative study 507
rDNA, Operon, rRNA, *Streptococcus salivarus* subsp. *thermophilus;* Genetic polymorphism, RFLP, Ribotyping, Probes 37
Replication, DNA, Supercoil, *Escherichia coli;* Initiation, Topology, Asynchrony, *dam, dnaA* 655
Replication, Plasmid, Cell cycle, F plasmid; Origins, *Escherichia coli* 541
Replicon, Plasmid, *Pasteurella, Actinobacillus;* Cloning vector, Gene expression, Broad host range, Electroporation 263
RFLP, DNA, Insertion, IS*6110,* Transposition, *Mycobacterium;* Insertion sequences, Copies, Polymorphism, Diagnosis, Tuberculosis, Epidemiology 767
Rhizobium leguminosarum, Nitrogen, *ntrC* mutant; Control, Phenotype 161
Rickettsia conorii, Actin, *Rickettsia typhi,*

Virulence, Motility; Actin polymerization, Intracellular movements 821
Rickettsia typhi, Actin, *Rickettsia conorii,* Virulence, Motility; Actin polymerization, Intracellular movements 821
rRNA, *Chlamydia trachomatis;* Restriction pattern, Cloned probe, Taxonomy, Typing, Biovars 755
rRNA, DNA, *Brucella;* Gene restriction patterns, Cloned probe, Typing, Taxonomy 55
rRNA, Operon, rDNA, *Streptococcus salivarus* subsp. *thermophilus;* Genetic polymorphism, RFLP, Ribotyping, Probes 37
rRNA, *Salmonella enterica,* Serovar Wien; Restriction pattern, Molecular typing, Molecular epidemiology 703
Saccharomyces diastaticus, Fermentation, Floculation, Mannose; Floculating mutant, Cell wall enzyme 81
Saccharomyces uvarum, Amphotericin B, Desertomycin, Phospholipid, Spheroplast; Plasma membrane, Cell growth, Subinhibitory doses 695
Salmonella, Coproculture; Selective medium, NBGL 211
Salmonella, O antigen, *Escherichia, Candida;* Common antigenic factors; Note 533
Salmonella; Serovars, Taxonomy, Kauffmann-White scheme 807
Salmonella enterica, rRNA, Serovar Wien; Restriction pattern, Molecular typing, Molecular epidemiology 703
Salmonella typhimurium, Mutation, Histidine; Environmental mutagenesis, His^+ revertants, Distribution of mutants, Selective factor, Poisson distribution 711
Salmonella typhimurium, Vitamin B_{12}, BtuB; Transport, Outer membrane protein, Nucleotide sequence, *btuB* gene 459
Sea water, Mercury, Transposon; Bacteria, Resistance, Probe 341
Serovar Wien, rRNA, *Salmonella enterica;* Restriction pattern, Molecular typing, Molecular epidemiology 703
Shigella flexneri, Virulence, Adhesion, *Entamoeba histolytica,* Mannone; Receptors, Type I pili, Invasive phenotype, Cooperation 67
Skin, *Malassezia furfur;* Growth, Methodology, Identification 731
Spheroplast, Amphotericin B, Desertomycin, Phospholipid, *Saccharomyces uvarum;* Plasma membrane, Cell growth, Subinhibitory doses 695
Spiramycin, DNA; Amplification, Genome instability, Regulated production 99
Spirochete, Chromosome, Virulence, Plasmid; Minichromosome, Maxichromosome, Genetic capacity, Linear replicons 623
Spirochete, Genetics, Biosynthesis; Pathways, Metabolism, Heat shock proteins, Enzymatic profiles, RNA 605
Spirochete, Genome; Structure, Insertion sequence, Extrachromosomal elements, *Borrelia burgdorferi, Treponema pallidum, Leptospira interrogans* 615
Spirochete, Motility, Chemotaxis, Flagella; Structure, Periplasmic flagella, *Treponema, Borellia, Serpulina* 597
Spirochete, Vaccine; Animal models, Diagnostics, Serology 641
Spirochete, Virulence; Host defences, Chaperonins, LPS, Lipoproteins, Protective immunity 630
Spirosome, Cytoplasm, Protein, Filament; *Escherichia coli,* Pyruvate dehydrogenase, Lipoamide dehydrogenase, Dihydrolipoamide acyltransferase, Alcohol dehydrogenase 743
Streptomyces bambergiensis, DNA, Plasmid, Mating, *Streptomyces lividans;* Transfer, Linear DNA, Physical map 839
Streptococcus gordonii, M protein, Gene *emm-6.1, Streptococcus pyogenes;* Transcription, Chromosomic, DNA, Genetic engineering 449
Streptomyces lividans, DNA, Plasmid, Mating, *Streptomyces bambergiensis;* Transfer, Linear DNA, Physical map 839
Streptococcus pyogenes, M protein, Gene *emm-6.1, Streptococcus gordonii;* Transcription, Chromosomic, DNA, Genetic engineering 449
Streptococcus pyogenes, M Protein, Phagocytosis, Virulence, Allele replacement; Pathogenesis, Koch's postulates 549
Streptococcus salivarus subsp. *thermophilus,* Operon, rDNA, rRNA; Genetic polymorphism, RFLP, Ribotyping, Probes 37
Sulpholipid, *Mycobacterium tuberculosis,* Tuberculosis; Thin-layer chromatography, Diagnosis 225
Supercoil, DNA, *Escherichia coli,* Replication; Initiation, Topology, Asynchrony, *dam, dnaA* 655
Supercoil, DNA, Plasmid, *Escherichia coli;* pUC18, Topology, Gyrase mutation, *recA* genotype, Bacterial growth 665
Taxonomy, *Corynebacterium;* Group D2, Genomic species, *"C. urealyticum"*, Phenotyping, Classification 307
Thiobacillus neapolitanus, Peptidoglycan, Glucosamine, Lysozyme; DAP, N-acetyl, Chemolithotrophy 47
Transcription, Promoter, Aminoglycoside acetyltransferase; Mapping, Homologies, Antibiotic biosynthesis 133
Transcription, Protein, *Neisseria gonorrhoeae;*

Periplasmic proteins, Amino acid transport, *hisJ, argT,* Cloning, Translation, Immunogenicity 295
Transduction, Operon, *Bacillus subtilis,* Bacteriophage SPB; Cloning vectors, Signal transduction, Two-component signalling systems, *degU* gene, Co-dominance 559
Transposition, DNA, Insertion, RFLP, IS*6110, Mycobacterium;* Insertion sequences, Copies, Polymorphism, Diagnosis, Tuberculosis, Epidemiology 767
Transposon, *Campylobacter jejuni,* Leucine; Biosynthetis, Shuttle mutagenesis, Cloning, Allelic replacement 15
Transposon, *Legionella,* Legionnaires' disease, Mutagenesis, Plasmid; Persistence, Replication 471
Transposon, *Legionella,* Legionnaires' disease, Virulence; Macrophage, Tn*5*, Defective growth, Multifactoriality 481
Transposon, Mercury, Sea water; Bacteria, Resistance, Probe 341
Tuberculosis, AIDS, *Mycobacterium tuberculosis, Mycobacterium,* Immunoregulation; Virulence, Markers; Forum 361
Tuberculosis, Cord factor, *Mycobacterium tuberculosis,* Glycolipid; Synthetic "mirror" pseudo cord factors, Serodiagnosis, Specificity, Sensitivity 217
Tuberculosis, Glycolipid, *Mycobacterium;* Antigens, Phenolglycolipids, TLC, Speciation 519
Tuberculosis, Isoniazid, Bactericidal effect, Drug resistance, Catalase, Peroxidase, *Mycobacterium aurum, Mycobacterium smegmatis;* Virulence, Gene cloning ... 721
Tuberculosis, *Mycobacterium tuberculosis,* Sulpholipid; Thin-layer chromatography, Diagnosis 225
Urease, Nickel, Hydrogenase, Metalloenzyme, Protein; Bacterial metabolism, Histidine, Cystein, Motifs 347
Vaccine, Spirochete; Animal models, Diagnostics, Serology 641
Vaginosis, *Gardnerella vaginalis,* DNA; RFLP, REA, Biotyping 199
Vibrio cholerae, β-Galactosidase, Plasmid, Lactose; GalR, Repressor, ChrA, Chromate resistance, *lacZ* gene 27
Vibrio parahaemolyticus, Haemolysin, Diarrhoea; Food poisoning, Kanagawa phenomenon, Purification, Properties .. 569
Virulence, Actin, *Rickettsia conorii, Rickettsia typhi,* Motility; Actin polymerization, Intracellular movements 821
Virulence, Adhesion, *Entamoeba histolytica, Shigella flexneri,* Mannone; Receptors, Type I pili, Invasive phenotype, Cooperation 67
Virulence, *Bordetella,* Pertussis toxin, Promoter; Regulation 671
Virulence, Chromosome, Spirochete, Plasmid; Minichromosome, Maxichromosome, Genetic capacity, Linear replicons 623
Virulence, DNA, *Listeria monocytogenes;* Genes, Serovars, PCR, Restriction enzymes 281
Virulence, Haemolysin, Fimbriae, CNF, *Escherichia coli;* Toxins, P fimbriae 869
Virulence, Listeriolysin O, *Listeria monocytogenes;* Serotypes 1/2a and 4b, Haemolytic activities 489
Virulence, M Protein, Phagocytosis, *Streptococcus pyogenes,* Allele replacement; Pathogenesis, Koch's postulates 549
Virulence, Spirochete; Host defences, Chaperonins, LPS, Lipoproteins, Protective immunity 630
Virulence, Transposon, *Legionella,* Legionnaires' disease; Macrophage, Tn*5*, Defective growth, Multifactoriality 481
Virulence, Zymotype, *Chlamydia psittaci, Chlamydia trachomatis;* Invasiveness, Ruminant isolates, Serotypes 525
Vitamin B_{12}, ButB, *Salmonella typhimurium;* Transport, Outer membrane protein, Nucleotide sequence, *btuB* gene 459
Water, Mycelium, Colony; Formation, Hyphal growth, Apical direction, Filamentous fungi 777
Yellow disease, Mycoplasma, MLO, Phytopathology; Grapevine, Detergents, ELISA, Diagnosis 791
Zymotype, *Chlamydia psittaci, Chlamydia trachomatis,* Virulence; Invasiveness, Ruminant isolates, Serotypes 525

INDEX OF ARTICLES PUBLISHED

Tome 143

Effect of *Bdellovibrio bacteriovorus* infection on the phosphoenolpyruvate: sugar phosphotransferase system in *Escherichia coli:* evidence for activation of cytoplasmic proteolysis, A.J. ROMO, E.G. RUBY and M.H. SAIER, Jr 5

Cloning of *Campylobacter jejuni* genes required for leucine biosynthesis, and construction of *leu*-negative mutant of *C. jejuni* by shuttle transposon mutagenesis, A. LABIGNE, P. COURCOUX and L. TOMPKINS 15

Identification of a *lacZ* gene in *Vibrio cholerae,* C. PARSOT 27

Detection of intraspecific DNA polymorphism in *Streptococcus salivarius* subp. *thermophilus* by a homologous rDNA probe, M. PÉBAY, C. COLMIN, G. GUÉDON, C. De GASPÉRI, B. DECARIS and J.M. SIMONET 37

N-unsubstituted glucosamine residues and other modifications in murein of the obligatory chemolithotroph *Thiobacillus neapolitanus,* J. BAJ, I. GRABOWSKA and Z. MARKIEWICZ 47

Molecular typing of *Brucella* with cloned DNA probes, F. GRIMONT, J.M. VERGER, P. CORNELIS, J. LIMET, M. LEFÈVRE, M. GRAYON, B. RÉGNAULT, J. Van BROECK and P.A.D. GRIMONT 55

A model of interaction between *Entamoeba histolytica* and *Shigella flexneri,* R. VERDON, D. MIRELMAN and P.J. SANSONETTI 67

Mycobacterium paratuberculosis binds fibronectin, P. VALENTIN-WEIGAND and K.M. MORIARTY 75

Isolement et caractérisation d'un mutant floculan de *Saccharomyces diastaticus,* J.P. GUIRAUD et A. FONTANA 81

High levels of anti-*Campylobacter*-flagellin IgA antibodies in breast milk, G. RENOM, M. KIRIMAT, A.J. GEORGES, J.C. PHILIPPE and P.M.V. MARTIN 93

Amplification of a particular DNA sequence in *Streptomyces ambofaciens* RP181110 reversibly prevents spiramycin production, A. DARY, N. BOURGET, N. GIRARD, J.-M. SIMONET and B. DECARIS 99

Interrelationships between protein phosphorylation and oligomerization in transport and chemotaxis via the *Escherichia coli* mannitol phosphotransferase system, G.R. JACOBSON 113

Biosynthesis and distribution of N-carboxyalkyl amino acids (opines) in bacteria, J. THOMPSON and J.A. DONKERSLOOT 127

Transcriptional mapping of the promoter of the aminoglycoside acetyltransferase gene *(aacC9)* of neomycin-producing *Micromonospora chalcea,* D. SALAUZE and J. DAVIES 133

Structure/function relationships in the *Escherichia coli* mannitol permease: identification of regions important for membrane insertion, substrate binding and oligomerization, C.E. BRIGGS, S.S. KHANDEKAR and G.R. JACOBSON 139

Bacteriocin-like activity of *Bacteroides fragilis* group isolated from marmosets, L.M. FARIAS, M.A.R. CARVALHO, C.A.V. DAMASCENO, E.O. CISALPINO and E.C. VIEIRA 151

Phenotype of a *Rhizobium leguminosarum ntrC* mutant, S. MORENO, E.J. PATRIARCA, M. CHIURAZZI, R. MEZA, R. DEFEZ, A. LAMBERTI, A. RICCIO, M. IACCARINO and G. ESPIN 161

Catabolic pools in *Escherichia coli,* S.R. PAI and H.E. KUBITSCHEK 173

Evaluation of a chemiluminescent DNA probe assay for the rapid confirmation of *Listeria monocytogenes,* O. OKWUMABUA, B. SWAMINATHAN, P. EDMONDS, J. WENGER, J. HOGAN and M. ALDEN 183

Contribution of high-performance liquid chromatography to the identification of some *Corynebacterium* species by comparison of their corynomycolic acid patterns, D. De BRIEL, F. COUDERC, P. RIEGEL, C. GALLION, J.-C. LANGS and F. JEHL 191

Heterogeneity in restriction patterns of *Gardnerella vaginalis* isolates from individuals with bacterial vaginosis, K. NATH, D. DEVLIN and A.M. BEDDOE 199

Novobiocin, brilliant green, glycerol, lactose

agar: a new medium for the isolation of *Salmonella* strains, D.M. POISSON 211
Evaluation of synthetic pseudo cord-factor-like glycolipids for the serodiagnosis of tuberculosis, A. LASZLO, H.H. BAER, M.B. GOREN, V. HANDZEL, L. BARRERA and I.N. de KANTOR 217
Identification of sulpholipid I by thin-layer chromatography in the rapid identification of *Mycobacterium tuberculosis,* M. LUQUIN, F. PAPA and H.L. DAVID 225
A case of lysogenic conversion: modification of cell phenotype by constitutive expression of the Mu *gem* operon, L. PAOLOZZI and P. GHELARDINI 237
Carbohydrate assimilation by saccharolytic clostridia, W.J. MITCHELL 245
Mutational analysis of the enzyme III^{Glc} of the phosphoenolpyruvate phosphotransferase system in *Escherichia coli,* G.Q. ZENG, H. De REUSE and A. DANCHIN 251
Construction of a broad host range shuttle vector for gene cloning and expression in *Actinobacillus pleuropneumoniae* and other *Pasteurellaceae,* J. FREY 263
Use of specific oligonucleotides for direct enumeration of *Listeria monocytogenes* in food samples by colony hybridization and rapid detection by PCR, M. BOHNERT, F. DILASSER, C. DALET, J. MENGAUD and P. COSSART 271
Restriction fragment length polymorphism in four virulence-associated genes of *Listeria monocytogenes,* A. VINES, M.W. REEVES, S. HUNTER and B. SWAMINATHAN 281
Cloning and characterization of a *Neisseria* gene homologous to *hisJ* and *argT* of *Escherichia coli* and *Salmonella typhimurium,* A. LAVITOLA, M. VANNI, P.M.V. MARTIN and C.B. BRUNI 295
Corynebacterium group D2 *("Corynebacterium urealyticum")* constitutes a new genomic species, P. RIEGEL, P.A.D. GRIMONT, D. De BRIEL, E. AGERON, F. JEHL, M. PELEGRIN, H. MONTEIL and R. MINCK .. 307
Detection of enterotoxigenic *Escherichia coli* in faecal specimens by acetylaminofluorene-labelled DNA probes, E. BEGAUD and Y. GERMANI 315
DOT-ELISA for detection of phenolic glycolipid PGL-Tb1 and diacyl-trehalose antigens of *Mycobacterium tuberculosis,* F. PAPA, M. LUQUIN and H.L. DAVID .. 327
Degradation of non-phenolic β-*o*-4 lignin substructure model compounds by *Acinetobacter* sp., N. VASUDEVAN and A. MAHADEVAN 333
Hybridization of transposon Tn*501* for detection of mercury resistance sequences in a marine environment, S.K. PRABU and A. MAHADEVAN 341
Putative nickel-binding sites of microbial proteins, L.-F. WU 347
Mycobacteria and AIDS: epidemiological and genetic markers, virulence factors and interaction with the immune system, N. RASTOGI and J.J. McFADDEN 361
New concepts in the mechanisms of $CD4^+$ lymphocyte depletion in AIDS, and the influence of opportunistic infections, M.L. GOUGEON and L. MONTAGNIER 362
Mycobacteria as cofactors in AIDS, F.M. COLLINS 369
Epidemiology of mycobacterial diseases in AIDS, C.R. HORSBURGH, Jr. 372
Clinical aspects of mycobacterial infections in HIV infection, R.J. COKER, T.J. HELLYER, I.N. BROWN and J.N. WEBER 377
Antibody levels to the type-specific glycopeptidolipid antigens of *Mycobacterium avium* in homosexual men: possible implications, I.M. ORME and D. CHATTERJEE 381
Genetic markers for the epidemiology of tuberculosis, J.D.A. van EMBDEN, D. van SOOLINGEN, P.M. SMALL and P.W.M. HERMANS 385
Control of disease progress in *Mycobacterium avium*-infected AIDS patients, S.E. HOFFNER, G. KÄLLENIUS and S.B. SVENSON .. 391
Macrophages, mycobacteria and HIV: the role of cytokines in determining mycobacterial virulence and regulating viral replication, R.S. WALLIS, J.J. ELLNER and H. SHIRATSUCHI 398
Cytokines, lymphokines, mycobacteria and AIDS, G.A.W. ROOK and A. VYAKARNAM 406
In vitro activity of antimicrobial agents against the *Mycobacterium avium* complex inside macrophages from HIV1-infected individuals: the link to clinical response to treatment?, D.M. YAJKO 411
Mycobacteria and AIDS: treatment, prevention and future prospects, L.S. YOUNG, L.E.M. BERMUDEZ and C.B. INDERLIED . 420
Epidemiological and genetic markers, virulence factors and intracellular growth of *Mycobacterium avium* in AIDS, J.J. McFADDEN, Z.M. KUNZE, F. PORTAELS, V. LABROUSSE and N. RASTOGI 423
The bacterial phosphotransferase system as a potential vehicle for the entry of novel antibiotics, T.R. PARR, Jr. and M.H. SAIER, Jr. 443
Expression of M6 protein gene of *Streptococcus pyogenes* in *Streptococcus gordonii* after chromosomal integration and transcriptional fusion, G. POZZI, M.R. OGGIONI, R. MANGANELLI and V.A. FISCHETTI 449

Conserved structural and regulatory regions in the *Salmonella typhimurium btuB* gene for the outer membrane vitamin B_{12} transport protein, B.-Y. Wei, C. Bradbeer and R.J. Kadner 459
Two unrelated alkaliphilic *Bacillus* species possess identical deviations in sequence from those of other prokaryotes in regions of F_0 proposed to be involved in proton translocation through the ATP synthase, D.M. Ivey and T.A. Krulwich 467
Transposon mutagenesis in *Legionella pneumophila*. — I. Persistence of suicide and broad host-range plasmids, M. Tully, S.A. Sharpe and S. Ashworth 471
Transposon mutagenesis in *Legionella pneumophila*. — II. Mutants exhibiting impaired intracellular growth within cultured macrophages and reduced virulence *in vivo*, M. Tully, A. Williams and R.B. Fitzgeorge 481
Immunoaffinity purification, stabilization and comparative characterization of listeriolysin O from *Listeria monocytogenes* serotypes 1/2a and 4b, G.M. Matar, W.F. Bibb, L. Helsel, W. Dewitt and B. Swaminathan 489
Typing of *Listeria* strains by random amplification of polymorphic DNA, S.-I. Mazurier and K. Wernars 499
A comparative study of randomly amplified polymorphic DNA analysis and conventional phage typing for epidemiological studies of *Listeria monocytogenes* isolates, S.-I. Mazurier, A. Audurier, N. Marquet-Van der Mee, S. Notermans and K. Wernars 507
A rapid and sensitive method for the identification of *Brucella* species with a monoclonal antibody, N. Vizcaino and L. Fernandez-Lago 513
Thin-layer chromatography systems for the identification of *Mycobacterium tuberculosis, M. bovis* BCG, *M. kansasii, M. gastri* and *M. marinum*, A. Laszlo, F. Papa and H.L. David 519
Enzyme electrophoretic polymorphism differentiates invasive from non-invasive *Chlamydia psittaci* ruminant isolates, B. Picard, E. Denamur, A. Souriau, J. Orfila, A. Rodolakis and P. Goullet 525
The antigenic relationship between *Candida tropicalis* and *Escherichia coli* (O 75, O 163) and *Salmonella* serotype Aberdeen O antigens, N. Aksoycan, H. Ataoğlu and I. Sağanak 533
Replication of mini-F plasmids during the bacterial division cycle, J.D. Keasling, B.O. Palsson and S. Cooper 541
Introduction of the *emm6* gene into an *emm*-deleted strain of *Streptococcus pyogenes* restores its ability to resist phagocytosis, J. Perez-Casal, M.G. Caparon and J.R. Scott 549
A *degU*-containing SPβ prophage complements superactivator mutations affecting the *Bacillus subtilis degSU* operon, L. Podvin and M. Steinmetz 559
Purification and characterization of Kanagawa haemolysin from *Vibrio parahaemolyticus*, J.P. Douet, M. Castroviejo, A. Dodin and C. Bébéar 569
Molecular biology of spirochetes: Introduction, A. Barbour, I. Saint Girons and F. Milward 581
Antigenic variation and strain heterogeneity in *Borrelia* spp., B. Wilske, A.G. Barbour, S. Bergström, N. Burman, B.I. Restrepo, P.A. Rosa, T. Schwan, E. Soutschek and R. Wallich 583
Spirochete chemotaxis, motility, and the structure of the spirochetal periplasmic flagella, N.W. Charon, E.P. Greenberg, M.B.H. Koopman and R.J. Limberger . 597
Genetic approaches to cell biology and metabolism of spirochetes, C.W. Penn, P.J. Bassford, D.B. Yelton, J. Dunn, D.R. Nelson, M. Fukunaga and G. Stanek 605
Genome structure of spirochetes, I. Saint Girons, S.J. Norris, U. Göbel, J. Meyer, E.M. Walker and R. Zuerner 615
Extrachromosomal elements of spirochetes, S. Bergström, C.F. Garon, A.G. Barbour and J. MacDougall 623
Interaction of spirochetes with the host, P. Hindersson, D. Thomas, L. Stamm, C. Penn, S. Norris and L.A. Joens ... 629
Spirochetes: vaccines, animal models and diagnostics, M. Simon, F. Milward, R. Lefebvre, L. Schouls, E. Fikrig, T. Wasmoen, K. Stover, B. Menefee and J. Robinson 641
The level of supercoiling affects the regulation of DNA replication in *Escherichia coli*, U. von Freiesleben and K.V. Rasmussen 655
Unusual structure of plasmid DNA formed in transformants of *Escherichia coli*, M. Kato and A. Furuno 665
Functional analysis of the pertussis toxin promoter, R. Gross, N.H. Carbonetti, R. Rossi and R. Rappuoli 671
Further characterization of the histidine gene cluster of *Streptomyces coelicolor* A3(2): nucleotide sequence and transcriptional analysis of *hisD*, D. Limauro, A. Avitabile, A.M. Puglia and C.B. Bruni 683

Membrane phospholipid composition in *Saccharomyces uvarum* cells grown in the presence of subinhibitory doses of amphotericin B and desertomycin, S. BENALLAOUA, J. COULON and R. BONALY 695
Molecular typing of *Salmonella enterica* subsp. *enterica* serovar Wien by rRNA gene restriction patterns, S. PIGNATO, G. GIAMMANCO, F. GRIMONT and P.A.D. GRIMONT 703
The origin of His^+ revertants of *Salmonella typhimurium* obtained on selective medium, F.S. GIZATULLIN and G.T. LYOZIN . 711
Isolation and characterization of isoniazid-resistant mutants of *Mycobacterium smegmatis* and *M. aurum,* B. HEYM and S.T. COLE 721
An improved method for quantitative culture of *Malassezia furfur,* I.-M. BERGBRANT, A. IGERUD and P. NORDIN 731
Characterization of high molecular weights of complexes and polymers of cytoplasmic proteins in *Escherichia coli,* R. IMAMURA, H. NIKI, M. KITAOKA, K. YAMANAKA, T. OGURA and S. HIRAGA 743
DNA fingerprinting of *Chlamydia trachomatis* by use of ribosomal RNA, oligonucleotide and randomly cloned DNA probes, C. SCIEUX, F. GRIMONT, B. REGNAULT and P.A.D. GRIMONT 755
Analysis of the regions responsible for IS*6110* RFLP in a single *Mycobacterium tuberculosis* strain, M.V. MENDIOLA, C. MARTIN, I. OTAL and B. GICQUEL 767
Pyrazinamidase activity in *Enterobacteriaceae,* S. PIGNATO and G. GIAMMANCO 773
Direction of hyphal growth: a relevant parameter in the development of filamentous fungi, P. MOLIN, P. GERVAIS, J.P. LEMIÈRE and T. DAVET 777
A one-step microbial DNA extraction method using "Chelex 100" suitable for gene amplification, X. de LAMBALLERIE, C. ZANDOTTI, C. VIGNOLI, C. BOLLET and P. de MICCO 785
Mise au point d'un test ELISA sur les tissus de vignes atteintes de flavescence dorée, A. CAUDWELL and C. KUSZALA 791
Supplement 1991 (no. 35) to the Kauffmann-White scheme, M.Y. POPOFF, J. BOCKEMÜHL and A. MCWHORTER-MURLIN 807
Intracellular movements of *Rickettsia conorii* and *R. typhi* based on actin polymerization, N. TEYSSEIRE, C. CHICHE-PORTICHE and D. RAOULT 821
FimC, a chaperone-like periplasmic protein of *Escherichia coli* involved in biogenesis of type 1 fimbriae, P. KLEMM 831
Characterization of a linear extrachromosomal DNA element (pBL1) isolated after interspecific mating between *Streptomyces bambergiensis* and *S. lividans,* S.B. ZOTCHEV, L.I. SOLDATOVA, A.V. OREKHOV and H. SCHREMPF 839
Nitrogenase activity in wheat seedlings bearing *para*-nodules induced by 2,4-dichlorophenoxyacetic acid (2,4-D) and inoculated with *Azospirillum,* A.M.M. ZEMAN, Y.T. TCHAN, C. ELMERICH and I.R. KENNEDY 847
A fourth metalloprotease gene in *Erwinia chrysanthemi,* J.-M. GHIGO and C. WANDERSMAN 857
Characteristics of haemolytic *Escherichia coli* with particular reference to production of cytotoxic necrotizing factor type 1 (CNF1), J. BLANCO, M. BLANCO, M.P. ALONSO, J.E. BLANCO, E.A. GONZALEZ and J.I. GARABAL 869
Regulation of nisin biosynthesis by continuous cultures and by resting cells *Lactococcus lactis* subsp. *lactis,* J. MEGHROUS, E. HUOT, M. QUITTELIER and H. PETITDEMANGE .. 879
Characteristics of cellulose colonization by a mesophilic, cellulolytic *Clostridium* (strain C401), E. GELHAYE, H. PETITDEMANGE and R. GAY 891
